ANNOTATION

In this article, the implementation of many reforms in public organizations after the independence of the Republic of Uzbekistan, the introduction of social pedagogic activities in public organizations and the need for its implementation and its main features are highlighted.

Key words: public organizations, social pedagogical activity, development strategy,

Address of the President of the Republic of Uzbekistan to the Oliy Majlis, national idea, and development strategy of New Uzbekistan for 2022-2026.

Social pedagogical cooperation of public organizations invites every Uzbek to social activity, to influence reforms, to enjoy life, to master the achievements of science, professional secrets, to live happily, to entrepreneurship. It gives spiritual strength to the implementation of the goals envisaged in the development strategy, through upbringing increases the cohesion, activity of citizens, loyalty to the motherland, responsibility and culture, and mobilizes them for great deeds.

Public organizations in the appeal of the president of the Republic of Uzbekistan to the Oliy Majlis "it is necessary to develop a national idea that will become a source of strength for us in the implementation of the ambitious tasks set before us", "we will build our great future together with our brave and noble people", "the people should serve our people, not, On April 8, 2019, the decree of the president of the Republic of Uzbekistan "on measures to develop a concept for the development of a national idea at a new stage of the development of

Uzbekistan", decrees and resolutions on globalization, education of the younger generation in the spirit of loyalty to the motherland, appeals to the Oliy Majlis, speeches in various international

Social pedagogical activity of public organizations the concept of continuous spiritual education of the population, youth is based on the objectives of the goal: to educate a person living on the ideas of loyalty to the motherland, entrepreneurship, harmony of personal and national interests, inviolability to reforms, intolerance to vices, kindness, a strong family, educational responsibility, interethnic harmony, religious tolerance, rule of law, innovative thinking, responsibility

"Any person living in our country, regardless of nationality, language and religion, can live a free, peaceful and wealthy life, live in satisfaction with life today – is our main goal"[2]. Based on this programmatic idea, "everyone in Uzbekistan will be satisfied with life!"the intention is defined as the main goal of the National idea of the people of Uzbekistan.

It will be a fundamental, cipsizing basis for nationwide social pedagogical practice. After all, the reality of the National idea is manifested in the fact that the people feel happy in a certain time and space, which is manifested in his gratitude - in his approval from life.also, the effectiveness of social pedagogical activity is manifested in the efforts of each parent, family, public organization to realize their duty to the nation, Homeland, people, to realize the debt for the present and future of their nation, to ensure that a person knows the national interests of their people, to preserve the material and spiritual heritage, to show self-sacrifice with.

Concepts that serve the realization of the idea of social pedagogical cooperation: "spirituality is our most influential weapon. "Our spiritual directions should go ten steps ahead of economic ones. It is then that the big plans and programs we are doing now come true"[3]. "Until 2030, we will achieve a more than 2 times increase in the gross domestic product of our country"[4].

During the years of independence, the idea of national independence served the period of national revival of Uzbekistan under the general idea of "free and prosperous Motherland, free and prosperous life". In complex ideological struggles, United the people, explained the essence of destructive ideas. It has absorbed the peace of the country, the prosperity of the Motherland, the well-being of the people, a perfect person, social cooperation, interethnic harmony, interfaith tolerance. However, not sufficiently connected with the process of socio-economic reforms taking place in the country, it became more limited in the spiritual and educational framework. A new stage of our development, intensive globalization, new threats and risks, a complex and threatening situation, requires the improvement of work in this regard in accordance with the demand and intensity of the Times.

The reforms carried out on the basis of the «development strategy of New Uzbekistan for 2022-2026" [5] created the best conditions for the coordination, unification of social pedagogical activities of public organizations, the transformation of youth education into the truly cooperative intention and will of our people. However, parents ' ignorance of national ideas and methods of educational work negatively affects the upbringing of young people and, through this, the development of the country. The provision of Social Pedagogy of the new era with national and world educational technologies serves to solve this problem.

Social pedagogical cooperation of public organizations of Uzbekistan has its rich invasion, intellectual, educational, ideological potential. After all, social pedagogical cooperation is aimed at deeply mastering the scientific heritage of ancestors in younger generations, continuing their activities at the level of requirements of the time, as well as:

The development of social pedagogical cooperation of public organizations has its own theoretical and methodological orientation, which necessitates conducting fundamental, practical, innovative research aimed at identifying the

essence of the concept of continuous spiritual education, studying the role of social education in the experience of developed countries, introducing new social educational tasks based on the reform process.

The organizational and practical direction of the social pedagogical activity of public organizations is considered to depend on the effective implementation of the tasks (roadmap) defined in the concept of "continuous spiritual education".

Social pedagogical activity and the mechanism of its implementation provide for the following main measures:

-Implement specific measures on "prosperous village", prosperous neighborhood", "our youth future", "every family entrepreneur", "economic development of the country", "development of the social sphere", "enlightenment and religious tolerance" and "5 important initiatives to raise youth morale and organize their leisure time in a meaningful way" and enrich the public's vision and knowledge of the National idea.

-Creation of new attributes serving youth education, national brands of Uzbekistan, rules of conduct, challenges, songs and cultural and educational animations. Ensuring a high quality of life and culture.

- Organization of meetings, conversations dedicated to the study of the ideological picture and problems of the world, inviting luminaries, scientists to the neighborhoods;

- Regular monitoring of harmful ideas distributed over the Internet, establishing systematic propaganda work against harmful ideas.

- Development of propaganda manuals for the system of continuing education, which reflected innovative and new approaches in the category "National Education".

In the column "continuous spiritual education" creates multimedia works of bright, colorful brochures, decorated with various paintings for parents, educators, children, young people.

Coordination of scientific research on new and current problems put forward in the concept of continuous spiritual education;

Creation of multimedia presentations based on scientifically based data obtained through the "spiritual and educational map of territories". Organization of scientific and creative studios under the Republican Center for the widespread promotion of the rich spiritual, cultural heritage of our people in the Republic and abroad.

Among them is the creation of documentary, educational and artistic films aimed at children, adolescents, young people and adults, dedicated to the promotion of the National idea.
