### ANNOTATION

This article covers the issues of increasing the effectiveness of education by introducing innovative technologies and techniques necessary for their study in the course processes in the Republic of Uzbekistan in the great importance given to foreign languages.

**Key words:** Foreign language, game, innovative technology, technological tools, methods, techniques.

The 21st century is a time when modern technologies are developing rapidly and are reflected in every field. In this globalized society, the demand for the study of foreign languages is increasing every day.

In the decree of the president of the Republic of Uzbekistan Shavkat Miromonovich Mirziyoyev dated May 19, 2021 “on measures to bring the activities of popularization of foreign languages in the Republic of Uzbekistan to a qualitatively new level” support youth and population in accordance with the state program” year of strengthening health”, the development of teaching foreign languages as a priority of educational policy, the radical improvement of the quality of education in this direction, the involvement of qualified educators in the field and increasing the interest of the population in the study of foreign languages importance is directed. A new stage in the teaching of foreign languages and a new era began in our country. In the process of teaching foreign language lessons, the use of advanced pedagogical technologies, interactive, innovative methods, communicative-informational means is required.

Recommendations of the pan-European framework for the teaching of a foreign language, assessment of the knowledge and skills of Foreign Language teachers (CEFR). According to him, textbooks were created for students of secondary schools and vocational schools. In accordance with these requirements, classrooms, new information were equipped with communicative techniques. Foreign language science is divided into four aspects (reading, writing, listening, understanding and speaking), on each of which special concepts and skills are given.

The importance of advanced modern technologies in teaching foreign languages is incomparable. In Zero education, the use of technological means plays an incomparable role in the assimilation and consolidation of knowledge in each section of the study of foreign languages. For example, it is impossible to carry out the formation of the skill of listening comprehension without a computer, player, CD discs. Listening comprehension is one of the most important parts of language learning. In this, the reader is required to pay attention to the pronunciation of the speaker at one time, compliance with grammatical rules, vocabulary and its meanings.

In today's globalization process, the internet has covered every aspect of our lives. The establishment of rational use of social networks, various sites in the study of foreign languages among the younger generation has become an urgent issue. To communicate with foreign speakers through the internet taking the opportunity, it is possible to develop the skill of speaking, improve the exercise of writing by correspondence by e-mail.

The importance of using multimedia tools in lesson processes is immeasurable. In particular, it is possible to organize a lesson in a meaningful way by organizing a lesson with slides, using methods that attract students to the beginning of a foreign language lesson (warm-up activities), using exhibitions of different colors, and to achieve a complete assimilation of the topic by students.

It has also been proven that the organization of lesson processes in schools through interactive games also gives huge positive results.

It is known that the passage of the lesson on the basis of various games develops not only the discovery of the possibilities of creative and critical thinking of students, but also the search for ways to concentrate, get out of problem situations. Because, the basis of the use of games is activity that activates and accelerates the reader. Psychologists note that the psychological mechanisms of playful activity rely on the fundamental needs of the individual for self-expression, finding a stable place in life, self-control, the implementation of their capabilities. On the basis of any game, the generally accepted principles of Education, tactics should lie. Educational subjects should be taken as a basis for educational games. In the process of games, the student takes a more interesting approach to this activity and behaves more freely than in a simple lesson. This makes it easier to work with students who are particularly shy by nature and cannot join the team quickly. It plays an important role in improving their accessibility skills. It should be noted that the game is the most sure a way of teaching.

Students are interested in Playing Lessons, strive to win, and ultimately also enrich their knowledge and skills. For example, the reader builds self-confidence in the process of participating in an English-language game, gets motivation that I can speak this language, listen and understand, write. We know that in the current educational process, the student must be a subject. The use of more interactive techniques in this increases the effectiveness of Education. One of the most important requirements for foreign language lessons is to teach students to think independently, creatively. Today, Foreign Language teachers in our republic, relying on the experience of teachers of the United States of America, England, use the following innovative techniques:– “problem situation solution” (Creative Problem Solving) when using this method, the narrative part of the beginning is read, and what will be the end of the students, the sentence is referenced.

<https://scopusacademia.org>

This in turn plays an important role in the development of students ' ability to independently spin.- "Cheerful riddles" (Merry Riddles) teach students riddles, the role of which in teaching foreign language is incomparable.

By memorizing a riddle, the vocabulary of the reader increases, besides, the importance of riddles is very great in strengthening memory.– “Quick answer” (Quick answers) will help strengthen the topic of the lesson mentioned;

– "Chigil wrote "(“Warm-up exercises”) the use of various games in the classroom to keep students interested in the lesson serves to adapt students to the subject to be taught before the start of the lesson;

– "Pantomime "(pantomime) this method can be used in a lesson where very difficult topics need to be explained, or when physical exercises are performed and students are tired;– the “story chain” (a chain story) method helps to grow students ' oral speech;

– "Role-playing games” (Acting characters) this method can be used in all types of lesson. To train, people in such professions as” interpreter“,” Translator“,” Writer“,” Poet “can participate in the lesson and talk with students;–” Assembly of scholars " (Thinkers meeting) U.Shakespeare, A.Navoi, R.Poets like Burns can “invite” waiters. At such a time, the use of the wise words spoken by them in the lesson will help to educate young people as perfect people;– the method “when speaking pictures” (When speaking Pictures) is much more convenient, helps in teaching English, in the development of oral speech of Students, Students, for this it is necessary to use pictures on the topic;– cards (quiz cards) Based on the above points, it can be concluded that each innovative technology has its own aspects of uniqueness. In all such methods, cooperation between the teacher and the student, the active movement of the student in the educational process are foreseen .As a result of the use of innovative technologies and methods in foreign language lessons, students ' logical and creative thinking skills develop, their speech becomes fluent, and the skills of quick and correct answers are formed.

Through the organization of classes in non-traditional ways, using various techniques, a boring training session is prevented. This creates the basis for an increase in interest in learning foreign languages among the younger generation, passion for learning, and an effective organization of classes. As a result, a thorough preparation of the student for the lesson is achieved, a rapid increase in the effectiveness of mastering.
